Emergency Service & Rentals are Available 24/7

Since 1983

Trask-DeCrow Machinery was incorporated in 1983 as the authorized distributor for Ingersoll-Rand, serving all of Maine & northern New Hampshire. In 2002 we acquired a southern NH industrial pump distributorship, which extended our territory throughout New England.

In 2006, Ingersoll-Rand sold their utility equipment division to Doosan Infracore Portable Power, located in Statesville, NC. That product line includes diesel driven portable air compressors, generators, and light towers, all of which we stock and service in Scarborough, Maine.

In 2011, we moved to our current location, an expansive 25,000 square foot building on 8 acres in Scarborough, Maine. TDM's facility includes administrative offices, a warehouse, parts and service & rental departments all under one roof. This move has increased operating efficiency and response time. Our shop is an impressive 10,000 square feet with two 4-ton bridge cranes and a full fabrication area, allowing us to handle the most demanding jobs with ease.

Today, TDM employs 36 people who are fully engaged in the sales, service and support of industrial pumps, air compressors, and related equipment.
