

# Prolong the life of your tools

Available in freestanding & drawbar configurations

# DryAIR

*The Solution to Your Portable  
Compressor Moisture Problems*

# DryAIR works by effectively removing harmful moisture from the discharge air of portable gas & diesel compressors. Cools air to within 15° of ambient temperature.

DryAIR units deliver cleaner compressed air, resulting in virtually no contamination on blast surfaces. Primer and paint adhere better, without *fish-eye* and troublesome spotting on finish coats.

Moisture is a poor lubricant and causes premature failure of paving breakers, jackhammers, rivet busters and related air tools. DryAIR will make a significant difference in prolonging the life of your tools.
